THIS great Series of Books, devoted as the name implies to works of an educational character, is being magnificently received by the musical people all over the country.

The Series embraces only copyrighted works, and contains material covering practically the entire range of instrumental and vocal study.

Many of these works are, and will be, thoroughly original in subject and presentation; while those not strictly novel will always be found superior in point of scope and construction to any existing writing on the same or similar subjects.

New and important works will appear regularly; and in the not distant future Schirmer's Scholastic Series will be as well known as the world-famous Schirmer's Library.

Several important works previously issued in a different series or character also have been incorporated in this Series.

When ordering ask for Schirmer's Scholastic Series (or S. S. S.), and give only the number.

The title of the document is "Schirmer's Library of Musical Classics: Exercises and Studies for Piano". It lists exercises and studies by various composers, including Berens, Bertini, Biehl, Brauer, Burghmüller, Chrisander, Clementi, Concone, Czerny, Döring, Dreysochek, Duvernoy, Egglein, Gurlitt, Haberler, Handrock, Hanon, and others. The exercises range from simple to complex, covering various aspects of piano playing such as technique, expression, and theory. The document appears to be a catalog or directory of piano exercises and studies, likely used for teaching or self-study. The text is dense with entries, each listing the composer's name, the work's title, and the specific exercises or studies included. The document is published by G. Schirmer, New York.
